

DEFROST TIMER

MODEL NAME	Time		Rated Voltage	Switch rating	Power consumption
	Cycle	Defrost			
TD	20LSA/CSA	6 hours and 40 minutes	12 minutes	110/220V	AC125/6A or AC250/5A Lower than 1.5W
	20C	6 hours and 40 minutes	5 minutes and 50 seconds	220V	
	20NT/NS	10 hours and 4 minutes	9 minutes	110/220V	
	CVD	12 hours	10 minutes and 48 seconds	240V	
CAF	3 hours and 20 minutes	22 minutes and 48 seconds	240V		

Application:

Refrigerator, Show case, Freezer

Function:

Remove frost on the surface of an evaporator and in the inside of refrigeration room by controlling the power supply compressor and defrost heater periodically

Features:

Low power consumption based on the method of synchronous motor using a permanent magnet. Constant time for defrost and cycles by delivering motor rotation to the gear to reduce it

Certification:

C-UL, TUV
